ABOUT ME

I am a Data Scientist with a strong passion for Machine Learning. I have gained extensive experience applying advanced machine learning techniques to complex particle accelerator systems, particularly the Large Hadron Collider at the European Organization for Nuclear Research (CERN). I am proficient in multiple programming languages, including Python, TypeScript, and Rust, and am highly experienced in both front-end and back-end development. Thanks to my background in physics and engineering, I'm a rigorous, autonomous, analytical and result-oriented professional, I thrive on tackling challenging problems and developing innovative solutions utilising the latest software technologies and best practices. Alongside my professional work, I actively engage in personal software projects to refine my skills and learn new ones, demonstrating my commitment to continuous growth and staying at the forefront of technological advancements.

WORK EXPERIENCE

Applied Machine Learning Scientist

European Organization for Nuclear Research (CERN)

2019 – 2024 | Geneva, Switzerland

- Using Machine Learning techniques to model, minimise and improve the understanding of losses occurring in the LHC.
- Developed a number of Machine Learning models targeting various aspects of the Large Hadron Collider.
- Developed purpose built, open-source, python tooling to facilitate data fetching, processing and visualisation.

Master's Research Project

European Organization for Nuclear Research (CERN)

Feb 2018 – March 2019 | Geneva, Switzerland

- Analysis of LHC experimental data to further the understanding of particle losses and develop models of the LHC using both statistical analysis and Machine Learning techniques.

Internship

UK Atomic Energy Authority - CCFE

May 2017 – August 2017 | Culham, UK

- Combined a variety of simulation software such as GEF, Talys and Geant4 using custom written python tooling to generate nuclear reaction datasets.

EDUCATION

Master's in Reactor Physics and Nuclear Engineering

Grenoble Institute of Technology - Phelma

2015 – 2018 | Grenoble, France

- Includes an ERASMUS student exchange with the Ecole Polytechnique Fédérale de Lausanne in Switzerland.

Bachelor's in General Engineering

Grenoble Institute of Technology - Phelma

2015 – 2016 | Grenoble, France

Classes Préparatoires - Theoretical Mathematics & Physics

Lycée Vauvenargues

2013 – 2015 | Aix-en-Provence, France

- Two years of intensive undergraduate program preparing for the national entry exams of graduate schools of engineering.

SKILLS

Python | Typescript | Rust | C/C++ | SQL & DB Design | Latex | React | Qt | git | Docker | Linux | Front-End Dev. | Back-End Dev. | Data Science | Data Visualisation | Machine Learning

SOFT SKILLS

Rigour | Autonomy | Result Oriented | Active Listening | Analytical Thinking | Scientific Communication | Team Spirit | Independent Learner | Curiosity

LANGUAGES

English
French
German
Arabic

EXTRA TRAINING

US Particle Accelerator School

Jan 25 – Feb 19 2021 | Remote

- Accelerator and Beam Physics.

Cern Accelerator School

Nov 11 – 23 2018 | Thessaloniki, Greece

- Numerical Methods for Analysis, Design and Modelling of Particle Accelerators.

INTERESTS

- DevOps, MLOps, generative art
- Chess, music, piano
- Snowboarding, hiking and climbing
